

Physical Security Solutions

Industry Leaders

Talon Investigation provides a broad range of enterprise risk management services designed to mitigate loss through customized and flexible solutions supported by professional expertise. Since 1995, **Talon Investigation** has provided professional security services to the business, financial and scientific sectors, government agencies, and private individuals. We enable our clients to focus on their core business while we focus on ours – managing risks.

Even the most comprehensive security program will fail if those entrusted with its implementation are ill suited for the assignment.

Talon Investigation's Physical Security Services program was developed to provide our clients a viable alternative to traditional contract security companies. **Talon Investigation's** physical security program provides an effective solution for organizations that require security agents with a high level of competence and operational capability.

Talon Investigation employs professionals from diverse and academic backgrounds. Many of our agents come from backgrounds such as military security, criminal justice programs, Federal, State, and local law enforcement agencies. All of our personnel are trained specific to their responsibilities. This high level of training and proficiency allows our agents to project professionalism and confident authority.

More Than a Presence

Talon Investigation personnel are highly trained career professionals who help clients to anticipate and prepare for all types of risks. They are trained facilitators who project the qualities of refinement, respectful assertiveness and confident control. The professional security agents working for **Talon Investigation** are well-trained, experienced, and respected professionals in their field.

The Difference

Meticulous selection, proper training, active supervision and twenty-four hour support of our personnel assure our clients the level and quality of service they require and are the keys to our success. Rather than presenting a uniformed guard appearance and demeanor, our staff is a high-caliber professional security team. Our agents routinely exercise balanced judgment in sensitive security matters. We reflect an assertive posture, which results in fewer security challenges, heightened respect and increased client satisfaction.

To improve the skills of our personnel, **Talon Investigation** provides all of our agents with ongoing in-service training in advanced security and public safety topics and issues. All *Physical Security Agents* are provided a solid grounding in security fundamentals beginning with the underlying theories that drive modern physical security tactics and strategies.

Approach

We believe that security should be proactive, rather than reactive. **Talon Investigation** physical security agents not only *Observe, Deter, and Report*, but also *Respond* and *Mitigate*. Our personnel are trained to be interactive facilitators - to professionally ensure that all aspects of the client's protection and security are addressed.

To ensure that our agents are effective in the field, **Talon Investigation** conducts a detailed client-needs assessment prior to assigning personnel to any client location. Each program is custom tailored to individual client needs. Our assessments routinely include a careful review of problems inherent to that specific client's locations and facilities, the associated security risks, client expectations, budgetary constraints and culture.

Based on this initial assessment, **Talon Investigation** works with our clients to develop a deployment and operations plan that effectively addresses the client's unique situation and needs. **Talon Investigation** will assist in developing client specific operating procedures that clearly define the role of our security.
